

## **DSP Electric Food Steamer (KA5015)**

The **DSP Electric Food Steamer (KA5015)** is a 1200W, 3-tier appliance with a total capacity of 12 liters, designed for healthy, simultaneous cooking of various foods.

### **Detailed Specifications**

<b>Attribute</b>	<b>Specification</b>
<b>Model</b>	KA5015
<b>Power</b>	1000-1200W
<b>Voltage</b>	220-240V~ 50-60Hz
<b>Total Capacity</b>	12 Liters
<b>Layer Capacity</b>	4.2L (bottom), 4.0L (middle), 3.8L (top) for a total of 12L, or 3x 4L layers as stated on some merchant sites
<b>Water Tank Capacity</b>	1.3 Liters (1300ml)
<b>Material</b>	BPA-free PA & PP (heat-resistant, non-toxic plastic)
<b>Control Type</b>	Knob control, with a 60-minute timer function
<b>Dimensions</b>	287 x 286 x 400 mm (Product size)

**Features** Auto shut-off, thermal protection, quick steam output in 30 seconds, water level indicator, stackable storage design

### **Key Features**

- **Rapid Steam**
  - The steamer begins releasing steam in just 30 seconds, speeding up meal prep.
- **Multi-Tier Cooking**
  - The three stackable, transparent layers allow for simultaneous preparation of different dishes without flavor mixing. The removable layer design means it can be used as a single, double, or triple-layer steamer depending on needs.
- **Ease of Use & Safety**
  - It includes a 60-minute timer to prevent overcooking and features automatic shut-off and thermal protection for safety. The water tank can be refilled during cooking through side inlets.
- **Healthy Cooking**
  - The design uses a micro-pressure system to lock in freshness and retain nutrients compared to traditional boiling methods.

These technical specification sheets detail the power, capacity, and features of the DSP Electric Food Steamer (KA5015):
